

“

WITH ALL THE BAD NEWS
THESE DAYS, I WANT TO ADD
TO THE GOOD SIDE OF THINGS.

I recently received my second COVID-19 vaccination through the Macomb County Health Department [MCHD]. ...What I really want to stress, though, is that both of my visits found that every single person working this operation was pleasant, helpful, kind and informative. I observed all of the workers treating every person there for a shot like family and friends, no matter their age, race or looks. I want to commend the MCHD not only for their efficiency of operation but especially for the hiring and training of all the people who are working there. It was a most pleasant experience, considering I was there for a shot!
